LANGUAGES

French
Native speaker — fluent & articulate

English
B1/B2 — Technical documentation, professional working proficiency

CORE SPECIALIZATIONS

Infrastructure & Network Security
Linux Hardening, TCP/IP, VLAN, Wireshark, Nmap, Cryptography (TLS/AES), Passkeys (FIDO2)

Software Engineering & Backend
Java, Python, C/C++, PostgreSQL, MySQL, Relational SQL, REST APIs, Docker

Mobile & Cloud Computing
Flutter, Dart, iOS (App Store Connect, APNs), Android, Firebase, Cloud

Engineering Practices & QA
Agile/Scrum, OWASP Top 10 Audits, Functional QA (103 Test Cases), Git/GitHub CI

STRENGTHS

- Cross-functional teamwork & communication
- Analytical rigor & clean code standards
- Attention to detail & software quality
- High adaptability & fast technical learning

INTERESTS

Football (Team spirit & discipline)

Music & audio creation

Tech monitoring, UI/UX design & Open Source

Rodrigue HESSOU

Software Engineer & Network Systems Security (Master's Degree / Bac+5)

Dual Expertise: Software Engineering & Cybersecurity • Direct Pathway to Master 2

PROFESSIONAL SUMMARY

Graduate student in **Computer Science & Network Systems Security at SUPINFO Lyon (5-year degree)** with a **Bachelor of Science in Software Engineering (Honors)**. Dual expertise spanning **software engineering** (Java, Python, Flutter, SQL, REST APIs) and **systems & network security** (Linux hardening, TCP/IP, cryptography, security audits). Proven track record delivering production-grade mobile apps (BoutiK), web platforms, and automated data pipelines. Ready to contribute with high autonomy and engineering rigor to ambitious software projects.

WORK EXPERIENCE

Software Engineering & QA Intern — Mobile, QA & Business Dev
Nataan Group (IT Services) — Lomé, Togo *Jul 2026 – Sep 2026*

- **BoutiK Mobile Application:** Co-developed a retail POS & inventory management mobile app using **Flutter**, connected to **Firebase** and integrated with **FedaPay** payment gateway.
- **iOS Architecture & Release:** Handled iOS porting, Apple HIG compliance, OTP authentication, Apple Push Notifications (**APNs**), and live production release on **App Store Connect**.
- **Quality Assurance & Web Overhaul:** Designed and conducted end-to-end functional test suites (executed **103 test cases**), performed UI/UX ergonomics audits, and led frontend web revamps.
- **B2B Tech Strategy & Data:** Engaged with **100 target SMB merchants** for requirement analysis and delivered structured customer data archiving solutions.

Web Development Intern
ATANYS — Lomé, Togo *Sep 2025 – Dec 2025*

- Designed and developed a full-stack web platform for reporting, indexing, and matching lost and found items.
- Contributed across the entire SDLC: requirements gathering, relational database modeling (SQL), core MVC development, and user acceptance testing.

Mobile Application Development Intern
Darollo Technologies Corporation — Lomé, Togo *Jul 2025 – Aug 2025*

- Built a bespoke **Flutter** mobile application for fashion artisans to streamline order management, client measurements, and delivery notifications.
- Engineered an **offline-first local persistence architecture** with automatic background data synchronization upon network recovery.

Data Management Intern
ONG-CRISTO — Lomé, Togo *Jul 2024 – Sep 2024*

- Built and automated a structured data collection pipeline for a field research consultancy.
- Cleaned, validated, and ensured the integrity of quantitative field survey datasets.

EDUCATION & CREDENTIALS

Master of Science in Infrastructure & Network Systems Security (Bac+5 / 5-Year Degree)
SUPINFO Lyon — Lyon, France *Since Oct 2026*

Bachelor of Science in Software Engineering (Honors / Mention Bien)
IAI-TOGO (African Institute of Computer Science) — Lomé, Togo *Nov 2022 – Dec 2025*

French Scientific Baccalaureate (High School Diploma, Mathematics & Physics)
LPL Le Rossignol — Lomé, Togo *Sep 2021 – Jun 2022*

CORE COMPETENCIES & KEYWORDS

Infrastructure & Network Security: Linux Hardening, TCP/IP, VLAN, Wireshark, Nmap, Cryptography (TLS/AES), Passkeys (FIDO2)

Software Engineering & Backend: Java, Python, C/C++, PostgreSQL, MySQL, Relational SQL Modeling, RESTful APIs, Docker

Mobile & Cloud Computing: Flutter, Dart, iOS (App Store Connect, APNs), Android, Firebase, Offline Sync Architecture

QA, Security & Engineering Practices: Agile/Scrum, OWASP Security Audits, Functional QA (103 Test Cases), Git/GitHub CI
